Wood Science and Technology

Journal for Wood and Pulp

of the International Academy of Wood Science (IAWS)

Editor: F. F. P. Kollmann, München

Editorial Board: F. E. Dickinson, Richmond
K. Kratzl, Wien
W. Liese, Hamburg
D. Noack, Hamburg
H. Schulz, München
T. E. Timell, Syracuse

Vol. 10 · 1976

Contents

Originals

Archer, R. R.: On the distribution of tree growth stresses. Part II: Stresses due to asymmetric growth strains. 293
Bamber, R. K.: Heartwood, its function and formation. 1
Bosshard, H. H.: Functional tropism. 69
Cardwell, R. D., Luner, P.: Thermogravimetric analysis of pulps. Part I: Kinetic treatment of isothermal pyrolysis of cellulose. 131
Cardwell, R. D., Luner, P.: Thermogravimetric analysis of pulps. Part II: Kinetics for dynamic thermogravimetric analysis. 183
Cave, I. D.: Modelling the structure of the softwood cell wall for computation of mechanical properties. 19
Cousins, W. J.: Elastic modulus of lignin as related to moisture content. 9
Dickinson, F. E.: Scientific and economic aspects of wood research as we look to the future of wood. 73
Douek, M., Goring, D. A. I.: Microscopical studies on the peroxide bleaching of Douglas fir wood. 29
Fengel, D., Przyklenk, M.: Studies on the alkali extract from beech holocellulose. 311
Grossman, P. U. A.: Requirements for a model that exhibits mechano-sorptive behaviour. 163
Hewgill, F. R., Legge, F.: On the antioxidant activity of phenols obtained by hydrogenation of Eucalyptus diversicolor wood. 125
Hillis, W. E., Yazaki, Y., Bauch, J.: The significance of anomalous extractives in heart-shakes in Dacrydium species. 79
Kibblewhite, R. P., Brookes, D.: Distribution of chemical components in the walls of kraft and bisulphite pulp fibres. 39
Klamecki, B. E.: Friction mechanisms in wood cutting. 209
Krilov, A.: Effect of thermal high-frequency surface hardening on the hardness and microstructure of bandsaw teeth. 199
Noack, D., v. Roth, W.: On the theory of elasticity of the orthotropic material wood. 97
Okuma, M.: Plywood properties influenced by the glue line. 57
Orosz, I.: Relationship between apparent modulus of elasticity, gage length, and tensile strength. 273
Parameswaran, N., Liese, W.: On the fine structure of bamboo fibres. 231
Parthasarathy, M. V., Klotz, L. H.: Palm "Wood". Part I: Anatomical aspects. 215
Parthasarathy, M. V., Klotz, L. H.: Palm "Wood". Part II: Ultrastructural aspects of sieve elements, tracheary elements and fibers. 247
Rak, J.: Leaching of toxic elements from spruce treated with ammoniacal solutions of copper-zinc-arsenic preservatives. 47
Saurat, J., Guéneau, P.: Growth stresses in beech. 111
Siau, J. F.: A model for unsteady-state gas flow in the longitudinal direction of wood. 149
Ugolev, B. N.: General laws of wood deformation and rheological properties of hardwood. 169
To the 70th Anniversary of Professor Dr.-Ing. Dr. h. c. Franz F. P. Kollmann. 161

Letters to the Editor

Maloney, T. M.: Composition board industry moves forward with new science and technology. 155

IAWS Bulletin Board

First meeting of the European-African Group of the International Academy of Wood Science at Banska Bystrica. I–II

Fifth plenary meeting of the International Academy of Wood Science, Copenhagen, Denmark, June 17–19, 1976. Election of fellows. News of members. I–IV

Book Reviews
